Education

- General Assembly - Software Engineering Immersive (Flex)   November 2022 - May 2023
- The software engineering immersive program taught me the fundamental skills to build full-stack web applications. This program was tailored for full-time working students like myself that were looking for a career transformation in technology.

Skills

- TypeScript (JavaScript), Swift(iOS), Django (Python), React-Native, Git, MongoDB, Postgres(SQL), Golang, Flutter (Dart), Astro (Framework), GitLab
- Fluent in Spanish, Portuguese, and English

Experience

General Assembly - Software Engineering Program   November 2022 - May 2023

- Learned and applied Javascript, Typescript, and Python for projects that enhanced software engineering skills
- Front-end frameworks like React and back-end using Django
- Currently learning to use React-Native (Typescript), SQL and Django (Python)

Assemblies of God World Vision - Volunteer Software Engineer   November 2022 - Present

- Providing technical support and troubleshooting assistance to end-users
- Actively participate in meetings to the planning and execution of IT projects
- Collaborate with cross-functional teams to identify and resolve technical issues

Anarchy.io LLM - Contributor (Software Engineer)   September 2023 - Present

- Collaborate issues that come up when running the LLM client.
- Receive and resolve tickets assigned to complete.
- Discuss different ideas on different LLM technologies to incorporate into the project.

Certifications

JPMorgan Software Engineering Virtual Experience Program on Forage

- Used perspective data visualization software and Python to monitor stock price trends
- Developed a dynamic stock history flowchart using React and TypeScript to visualize historical stock data

Programming Hub - Flutter

- This course will get you started with Flutter and help you understand the basic concepts and architecture of Flutter
- Working with Flutter widgets, layouts, dialogs, images, and so much more
